

Always Better®

Water Resistant

Lightweight

MOLLE
Compatible

The Handheld Radio Pouch holds an XTS Motorola Radio or similar sized handheld-type radio securely. Constructed out of a single piece of ULTRAcamp high-performance coated fabric laminate, the pouch is extremely durable, water resistant, and flame retardant. It has an open design on the sides to allow for better cooling of the radio unit and for easy access to the settings. The sides are lined with military-grade elastic bungee shock cord that's flexible enough to accommodate items of similar size.

The Handheld Radio Pouch has an open-top with a single Fastex Buckle closure. The upper portion of the radio is exposed for easy knob manipulation on the top of the device. The pouch mounts on any MOLLE compatible platform with the Patented Helium Whisper attachment system that reduces weight while greatly surpassing the durability of 1000D CORDURA®.

Weight
