5X TRIGLIDES-OA-BK

The BFG Triglides replacement pack is compatible with Blue Force Gear sling webbing that's 1.25" wide. The purpose of a Triglides is to capture webbing and hold it in place at a certain length or to affix additional mounting hardware. To attach a Triglides, simply thread the webbing through one side, over the middle bar, and out the other end. To secure the webbing in place, repeat this process in the opposite direction.

BFG Triglides come in two options - durable molded plastic and metal. The molded lightweight glass reinforced DuPont Zytel® Nylon version is extremely rugged and lays flatter for comfort while the metal, machined aluminum version is the most robust offering. The replacement pack contains 5 Triglides that are compatible with any 1.25" webbing.

Weight	Varies
Part #	TRIGLIDES-OA-XX (Nylon) TRIGLIDES-OM-BK (Metal)
Size	Varies
Features	
Easy sling attachment	Premium Material
