

Light Marking

Belt Attachment

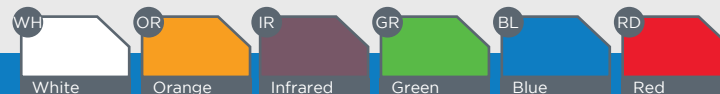

MOLLE
Attachment

The MARCO is an efficient, unique and compact way to carry room clearing, lane marking and numerous other uses. Conceived during the time consuming, pre-mission frustrations of unwrapping, taping and bundling traditional marking lights, the MARCO Dispenser cuts the prep time down to seconds. Open the package containing the preloaded dispenser, insert the MARCO Dispenser into its belt or MOLLE pouch, and proceed to mission. You also won't find that you're glowing after an accidental break on traditional marking lights while running to the breach point. The mini marking sticks deployed from the MARCO Dispenser put out approximately the same light under Night Vision Devices as a taped-up 4" marking light.

Weight	Varies on fill
Part #	MARCO-01
Size	2.23" x 5.28" x 0.65"
Features	
Reduce prep time for light sticks to almost Zero	1/3 the weight and much less bulk of equivalent option
