

MARCO® 1.5

PRODUCT SPECIFICATIONS

Weight	1.6 Oz
Size	5.75" (L) x 2.75" (W) x 0.75" (D)
Part #	MARCO-01-1EA
SKU	246000
Features	
one-hand chemlight deployment system	
30-Round Capacity	
optimized for low-light/NOD use	
Materials	
Injection-molded nylon	
Polycarbonate body	

Colors	
	MARCO-01-BLUE-1EA
	MARCO-01-GREEN-1EA
	MARCO-01-RED-1EA
	MARCO-01-WHITE-1EA

Gone are the days of 100mph tape, 550 cord, and improvised chemlight bundles. The MARCO platform was born from countless wasted hours prepping traditional 4" and 6" chemlights for training and operations. The MARCO 1.5 builds on the original with a redesigned deployment system and updated internal geometry engineered for faster, more intuitive activation under pressure, in a package smaller than a standard M4 magazine.

The key upgrade is in the breaker curve. The redesigned ramp now creates multiple micro-fractures across the chemstick simultaneously upon activation, versus the single crack point of the original MARCO. The result is brighter, faster activation the moment you snap it with no shaking required.

Optimized for low-light and NOD operations, the 2" chemlights deliver the same subdued signature as taped 4" or 6" sticks while eliminating bulk and accidental activation. Ideal for room marking, firing line identification, target designation, and training. Built from rugged injection-molded nylon, lightweight, durable, and purpose-built for professionals operating in demanding environments.
